

# FRIEDENSOASEN

More or less refugees  
Another way to cope with the refugee-crisis

The multiple tragedies in the Mediterranean Sea can't be ignored. The helpless reactions of political leaders by avoiding clear targets create consternation in large parts of the European population.

The fractures in the field of public opinions concerning the topic of refugees influence even election results.

There will be another way: we will help somewhere else. There, where refugees try to pass over to Europe.

**FRIEDENSOASE** - that's the name of the idea (OASIS OF PEACE).

European countries offer protection and job creation

## **FRIEDENSOASE = PROTECTION + WORK**

Shield of European military forces. Work by forestation of desert areas. Austria starts, other countries will follow and shape an European project. Stable states in North Africa and Middle East, ready to cooperate will profit from the economical and cultural interactions.

Therefore **FRIEDENSOASEN** are no tool to prevent asylum, but will be a human corrective in times of rushing masses.
